CYBERK

Portfolio 2026

Together, we build dream

01

Our Story

How Cyberk Was Born

CYBERK is a technology company with a highly skilled and passionate team dedicated to delivering high-quality software solutions. Cyberk has provided comprehensive and innovative solutions to many different partners around the world such as Singapore, Korea, Switzerland, Vietnam, Japan,...

What started as a small five-person team quickly grew as Jon and Anderson began taking on diverse projects. Driven by a shared vision to build a reliable, high-caliber technology partner, they expanded Cyberk to a 50-person strong team specializing in cutting-edge AI and Blockchain development.

Our Story

How Cyberk Was Born

Their passion for innovation led them to develop internal tools to streamline their operations.

Today, Cyberk continues to invest heavily in research and development, creating advanced analytics tools and AI-powered internal CRM systems. These innovations enhance operational efficiency, both within Cyberk and for their clients, solidifying the company’s reputation as a trusted technology partner.

The Challenges Behind Big Dreams

You may have a groundbreaking idea, a dream that could change everything.
But the path from idea to a real product is full of obstacle

Time pressure

The market waits for no one. Every delay is a missed opportunity

Rising costs

Building and maintaining an in-house team is expensive and risky

Talent hunt

How do you find people who are not only skilled, but also truly passionate about your vision?

Our Promise

Turn Your Dream Into an MVP in Just 1 Month

We break all traditional barriers. With Cyberk, you don't have to wait quarters or years. We're committed to bringing your Minimum Viable Product (MVP) to market in just one month.

Speed to Market is the key competitive advantage we deliver for you.

Our Formula for Success

How do we deliver on our promise? The secret lies in Cyberk's exclusive "Value Triangle".

Superior Process

AI-Driven Development: We pioneer AI-driven software development methods. This maximizes productivity without compromising quality

Elite Team

Top 1% Developers: We only recruit the brightest talents from Vietnam's leading tech universities like HUST and FPT. They are not just coders, they are problem solvers.

Partnership Philosophy

Think Like a Founder, Act Like Your CTO: We don't just build software. We become your technology partner, sharing your vision and passion. Your success is our success.

02

Our Service

MVP Development

Our Service

01 An all-in-one solution that helps turn your idea into a real product and launch it to market within 1 month

Launch in 1 Month:
Deliver your MVP to market faster than traditional methods, ideal for testing ideas quickly and gaining early feedback

All-in-One Solution:
From ideation to development, everything is handled in one streamlined process

Cost-Efficient Approach:
Focuses on building only the core, essential features, saving time, money, and resources

Built by Experts:
Developed by an elite team with deep product and technical expertise

AI Agent Development

Our Service

02

We build custom "AI agents" that transform your manual business processes into smart, automated, and proprietary systems

Integrate AI (LLM) with DeepSeek:
Seamlessly combine Large Language Models with DeepSeek for enhanced data analysis.

Infrastructure for AI:
Develop scalable, secure cloud environments tailored for AI operations.

Deploy AI Solutions:
Implement AI agents into existing systems for improved efficiency.

Design Prompts for AI Agents:
Craft effective prompts to optimize AI agent interactions and responses.

Dedicated Lab

Our Service

03

We help you build a long-term, dedicated development team that is fully focused on your product — ensuring stability and sustainable growth.

Stable delivery, flexible scaling, and minimized risks, all with a team that truly understands your product.

Ensure stability in developing and operating products with real users.

Optimize costs, reduce risks in staffing and technology.

A dedicated team deeply understands your product and company culture.

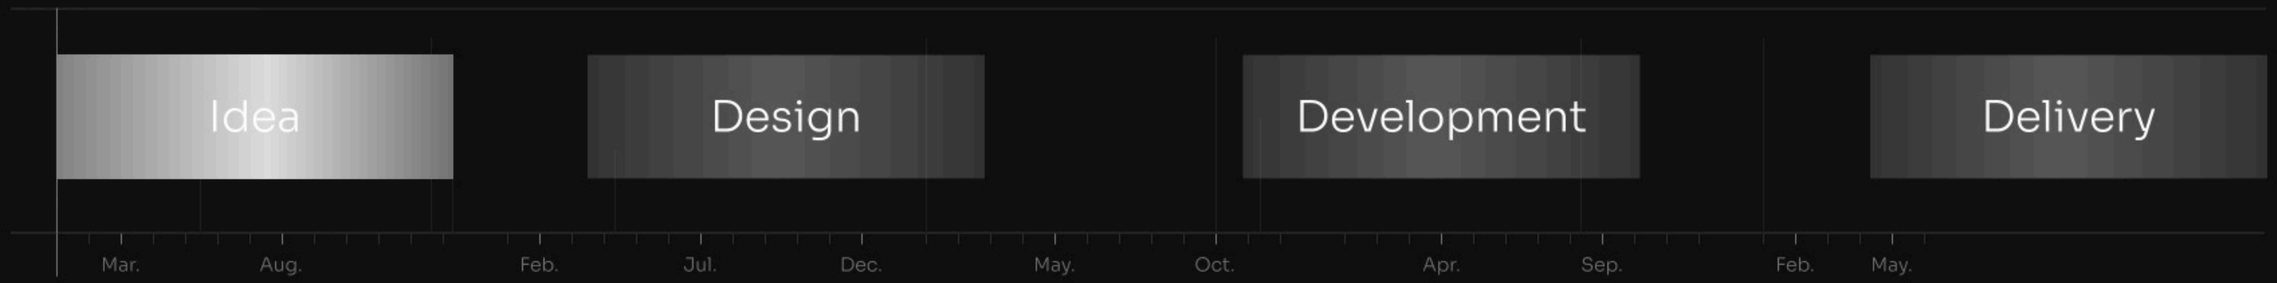

Flexibly scale the team up or down as needed.

Our Case Studies

How We Build with Our Clients

We work side-by-side with our clients across every stage of the journey

From the first sketch to real users, each case study reflects our hands-on, full-cycle commitment to turning vision into product.

Our Case Studies

AETHIR

Project Description

Aethir's GPU Dashboard is a powerful, centralized platform designed for managing and monitoring contributed GPUs within a decentralized cloud network.

Role of Cyberk

Developing website infrastructure, integrating Web3 protocols, building DApps for staking activities, and managing system operations

Aethir

Notable Case Studies

COINSEEKER

Challenge

Build a real-time blockchain data analytics platform to handle massive data volumes

Cyberk's Solution

Designed and developed the core system, optimizing data processing performance.

Result

Acquired by Titan Lab for $30 million, becoming one of the most notable M&A deals in the industry.

coinseeker.co

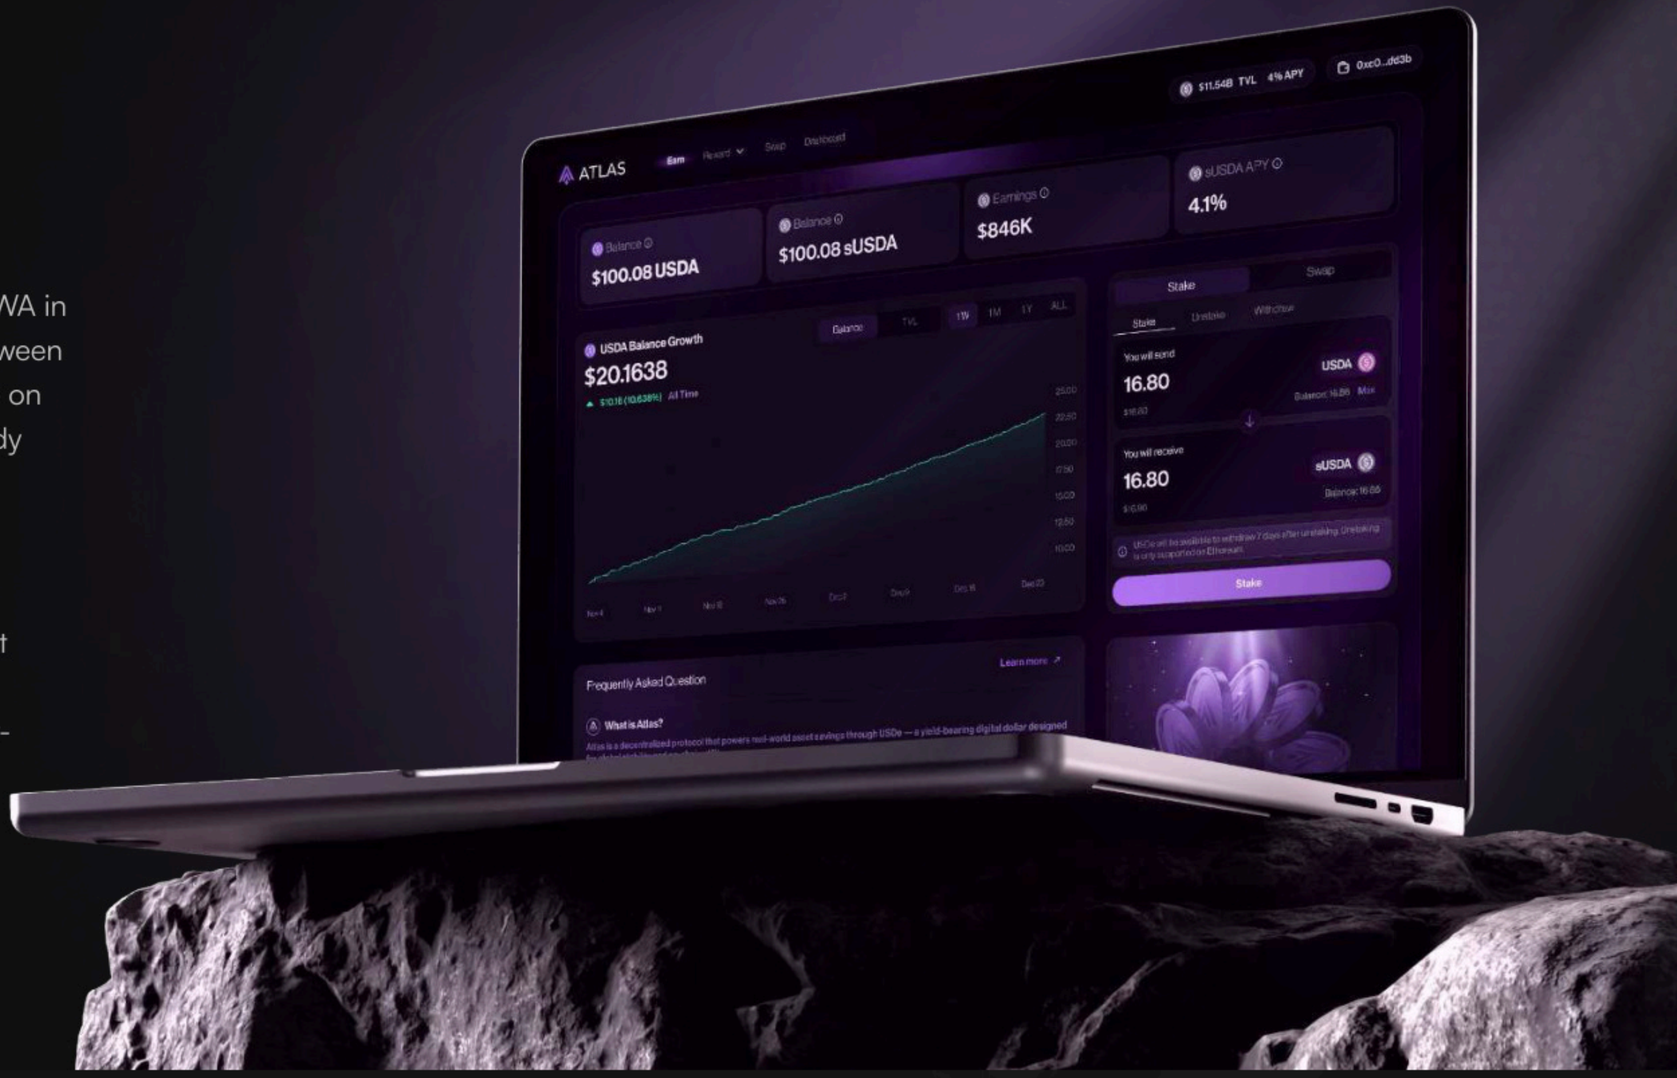

ATLAS

Project Description

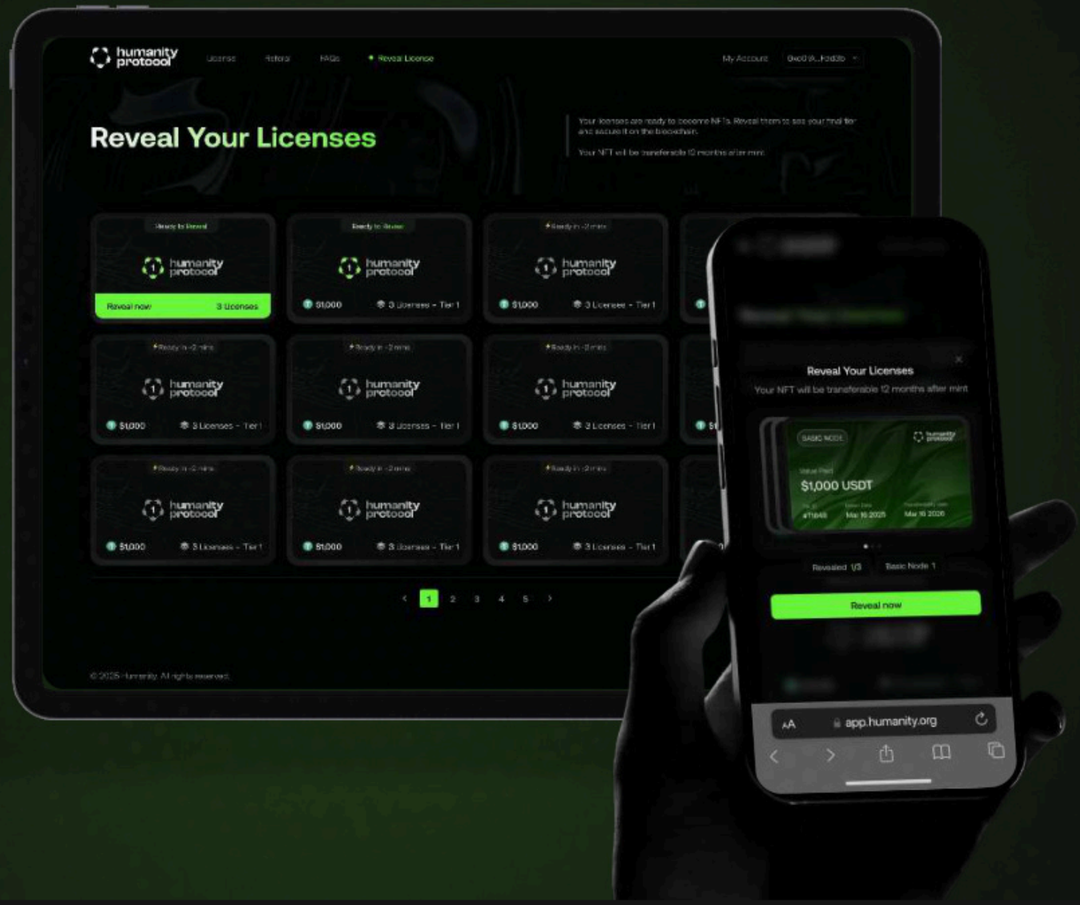

Atlas is designed to tokenize, manage and interact with RWA in a fast, transparent and scalable way. By filling the gap between traditional Finance and DeFi, Atlas enabling RWA to move on chain while maintaining a user friendly and institution-ready experience.

Role of Cyberk

At Atlas, we are responsible for developing smart contract development, USDA stablecoin. Additionally, we craft sophisticated purple-like UX/UI designs that prioritize user-centric principles, leveraging modern design systems, accessibility standards, and intuitive interfaces to deliver seamless, secure, and engaging experiences.

HUMANITY

Project Description

Humanity is a highly scalable and decentralized EVM based solution that enables any online actor to be cryptographically proven as a real human through its Proof-of-Humanity mechanisms based on biometric data.

Role of Cyberk

We are responsible for developing the Humanity Protocol Node Sale Smart Contract and actively operate validator nodes for staking rewards, supporting the protocol's highly scalable, decentralized EVM-based solution

humanity protocol

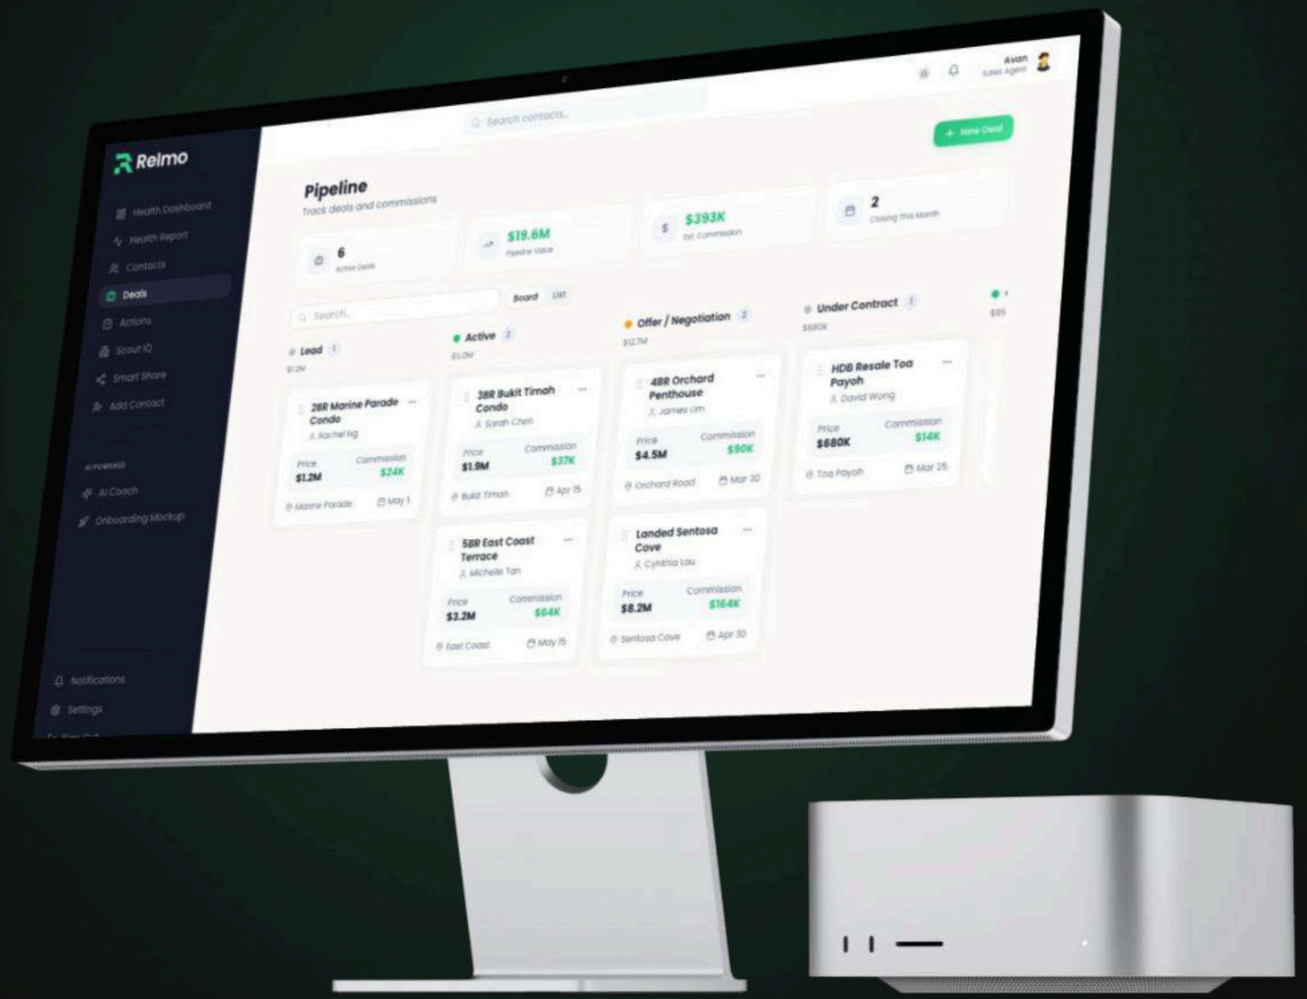

RELMO

Project Description

RELMO is a relationship intelligence operating system designed for real estate agents. Its purpose is to ensure no lead, client, or relationship is forgotten or neglected, while also making it extremely fast for agents to communicate with their contacts.

Role of Cyberk

Cyberk designed and built RELMO's AI-driven system, including conversation analysis, sentiment detection, and the Relationship Health Score engine. We also developed the action engine and AI messaging assistant to automate follow-ups and generate context-aware replies for agents.

Relmo

Notable Case Studies

VISIBLEBRAND

Project Description

VisibleBrand is the first-to-market SaaS Platform designed to transition business from the era of the Search Engine Optimization (SEO) to Artificial Engine Optimization (AEO) and Generative Engine Optimization (GEO)

Role of Cyberk

Cyberk built VisibleBrand's AI optimization engine for AEO and GEO. We developed systems to analyze user intent, identify high-potential keywords, and generate brand-consistent content, along with actionable recommendations to improve visibility across search and generative platforms.

VISIBLEBRANDS

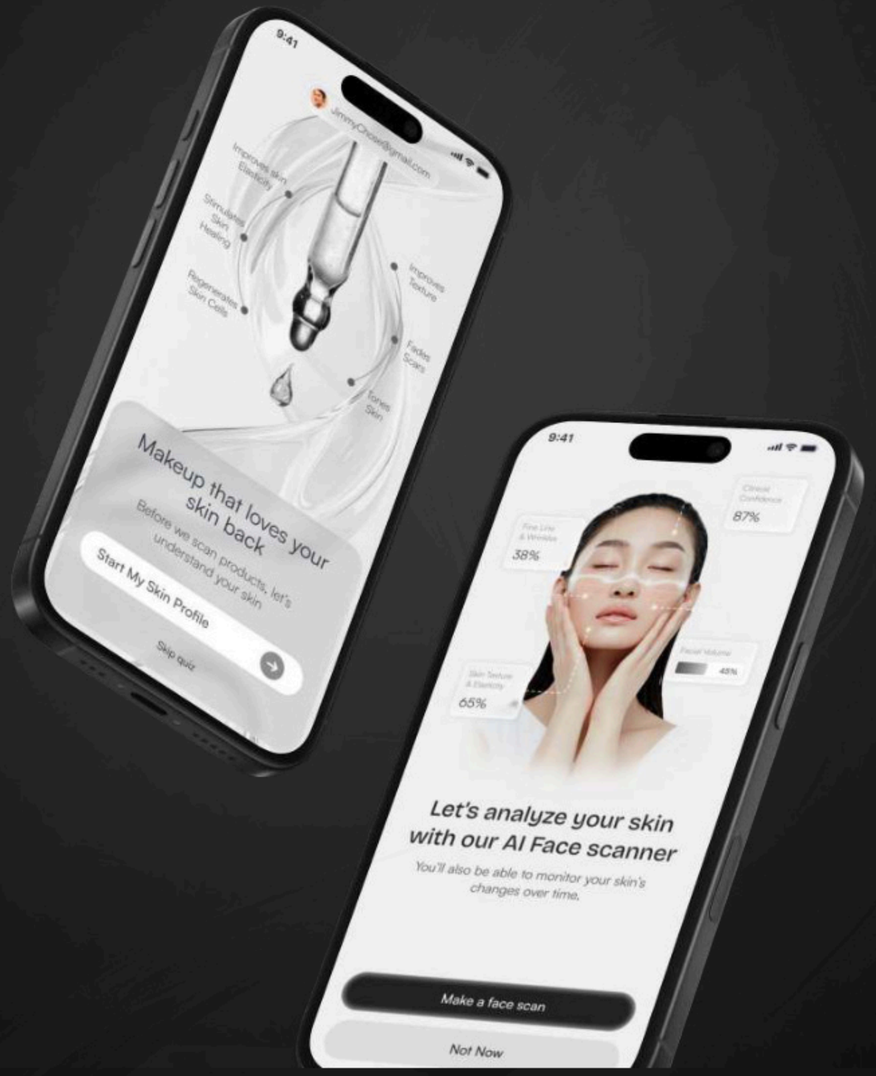

THE SKIN AGENT

Project Description

SkinAgent is an mobile AI app that analyzes skincare products in real time by combining biological data with environmental factors. It detects ingredient conflicts, generates personalized suitability scores, and delivers unbiased recommendations while keeping user data fully secure.

Role of Cyberk

Cyberk led the end-to-end design and development of SkinAgent, from UX/UI to AI system architecture. We built the core intelligence layer for real-time skin analysis, product scanning, and personalized recommendations, while ensuring a secure, privacy-first experience.
